

2017 ARS National Convention HORTICULTURE SCHEDULE

RULES:

1. This show is governed by the rules and regulations of the American Rose Society for the exhibition of garden roses as they appear in the *Guidelines and Rules for Judging Roses* (Revised 2012) as amended. Entries in violation of ARS or Show Rules will be disqualified. In case of any conflict between this schedule and the *Guidelines*, this schedule will govern.
2. All exhibitors must be registered for the Convention. Exhibitors need not be members of the American Rose Society or a local rose society except where specified in a Class or Section description.
3. The horticulture prep area will open at 10:00pm on Friday, September 8, 2017. Horticulture entries may be placed in the Show Room from 5:00am to 9:45am on Saturday, September 9, 2017. **All entries will close at 9:45am on Saturday, September 9, 2017.** All entries except entries in challenge classes will be placed by the placement committee. Entries in challenge classes (Sections A, B, and F) will be placed by the exhibitor. With the exception of challenge classes and classes specifically requiring multiple varieties, all roses will be placed alphabetically.
4. Judging will begin at **10am**. Only members of the Show Committee and judges and clerks assigned to the Show will be permitted in the show area during judging. **The decision of the judges is final.**
5. Entries must be entered using the approved ARS exhibition names as listed in the following: *Modern Roses12*, *Official List of Approved Exhibition Names*, *Handbook for Selecting Roses*, recent registration on the ARS website, and the online Modern Roses database. **The online Modern Roses database is the most up-to-date reference and will take precedence over all other references.** If a variety is not listed in any of the above official ARS sources, the *Combined Rose List* may be used as a reference, provided the variety is not a "found rose".
6. Entry tags, properly completed with the exhibitor's name, the class number, and the cultivar name or names, must accompany each entry. Exhibitors should place their convention registration number on the tag as their exhibitor number. If two convention registrants are exhibiting as a team, only one number should be used. Each specimen must have its own entry tag except in classes where a collection is shown in one container. In that case all varieties must be listed on one tag using the back of the tag if necessary. **Only the top section of the entry tag needs to be completed.**
7. The following wedging materials are permitted: rose leaves, plastic films (Saran® wrap, etc.), paper towels, and firm, **nonabsorbent** plastic foam (e.g. Sahara® and Styrofoam®). **No other wedging materials including soft, water absorbing foam products (e.g., Oasis®) are permitted.** Wedging material should not extend above the lip of the container such that it distracts from the exhibit.
8. All entries must have been grown by the exhibitor in his or her own private outdoor garden. Except for Class E-4 (Judges' Classes) and Classes A-14 and E-2 (Seedlings), only one person or team from any one garden may enter a class. Exhibitors are limited to one entry per class in Sections A, B, and F. Each variety will be judged as a separate class. Unless indicated otherwise, in Sections C, D, and E, each exhibitor may make as many entries as desired, provided each entry is a different variety.
9. One-bloom-per stem and open blooms of hybrid teas, grandifloras, floribundas, miniatures, and minifloras must be exhibited without side buds. Side buds are permitted in all other specimens. Only shrubs (classic and modern), Old Garden Roses (Dowager and Victorian), and species may be exhibited stem-on-stem.
10. The following definitions apply to this schedule. **Exhibition stage** is the stage at which a bloom is at the most perfect phase of possible beauty. The exhibition stage of a bloom depends on the number of petals that it has. For many-petaled blooms the exhibition stage bloom shows classic hybrid tea form: a bloom that is gracefully shaped with the petals symmetrically arranged in an attractive circular outline tending to a high center. For single and semi-double blooms the exhibition stage bloom is fully open yet still fresh with bright fresh stamens. A **spray** is a group of florets containing two or more blooms on one main or lateral stem. A **large rose** is a bloom of any class of rose except miniature and miniflora. A **single bloom** is a bloom of any rose having 4 to 8 petals and/or a bloom of a rose classed as a single by the American Rose Society.
